PROCESS TO CREATE CORRECT PAO FOR PRINTING

- Please send: pdf file, 300dpi, cmyk, FOGRA39 color profile

→ Remove all template lines and notes before export

- Do not show extrusion zones (cookie center, holes in the cover...)

→ If you want a cover with one or two holes, mention it clearly when you send us your design

- If you want to use special inks :

→ create a direct tone in your pdf file. Name your direct tone with pantone number and mention it clearly when you send us your design

- Embed links / Vectorize fonts

- The indesign file has pages templates ready to go
